

Fim do playbook:

```
PLAY RECAP *****
adqtrjasbhm101.adq.local : ok=723  changed=249  unreachable=0    failed=0    skipped=320  rescued=0    ignored=0
localhost                : ok=41   changed=0    unreachable=0    failed=0    skipped=81   rescued=0    ignored=0
```

Testes de Validação:

```
podman ps --format "table {{.Names}}\t{{.Status}}"
```

```
[ansible@adqtrjasbhm101 ~]$ podman ps --format "table {{.Names}}\t{{.Status}}"
NAMES                                STATUS

LOAD    = Reflects whether the unit definition was properly loaded.
ACTIVE  = The high-level unit activation state, i.e. generalization of SUB.
SUB     = The low-level unit activation state, values depend on unit type.
20 loaded units listed. Pass --all to see loaded but inactive units, too.
To show all installed unit files use 'systemctl list-unit-files'.
